Mr. Mokre opposed the bill on the ground that it was following aristocratic procedents, and that the nation's cratitude was due more pressingly to the mation. Mr. Firers supported the bill, and expressed the hope that it would be passed by an unanimous vote.

Mr. Smrift followed on the same side, and expressed his regret that any member from his State (meaning Mr. Mc-Kee) should take a different position.

Mr. Rogers also supported the bill, but reminded the House that there were other able and illustrious Generals who were entitled to the gratitude of the American People, and that the men who fought in the ranks and gained the victories were not to be forgotten.

The affairs of the O'Mahony branch of the Fenian Brotherhood are becoming more and more deranged. The circles are discontented, and openly demand an explanation; the subalterns are in a state of mutiny; the sinews of war are withheld; the prophecies relative to the arrival of Stephens have not been fulfilled, and, greatest of all evils, it is rumored that the great chiefinir, who was to lead the Irish Republican Army from New York to Dublin, and dietate terms to the Queen of England from the halls of Buckingham Palace, is in a state of mind bordering on insanity. The Union-square headquarters are almost described, and the officials at that explanation of the Pacific Railroads. The Union-square headquarters are almost descried, and the officials at that establishment are anything but courteous or polits. The fact is, O'Mahony expects to be disturbed in his occupation of the massion, and has made preparations for a vigorous defense. Killina is reported to have sinster designs on the Head Center, and his (Killian's) movements are closely watched by a few devoted admirers who still believe in the genius of O'Mahony. The disaffected muster in large numbers each evening on the sidewalk in front of the Moffat massion, and it is asserted that some of the more discontented circles have detailed a guard of a dozen men, who are relieved at regular intervals to watch the Headquarters. Extensive preparations have been made for the arrival of Stephens, which appears to be as far off as ever. The circles have been told to hold themselves in readiness to turn out at a mouncant's notice to give the President of the Irish Republic a reception bealting one of his exalted position and influence. The Fernian Fair has closed, the receipts by no means equaling the expectations of the enthusiastic sisters. Many of the circles in violation of the orders from Union-square, have resolved to send no more money to that quarter until an investigation shall have been held, and the object of the late move on Canada, the cause of its failure, and other precautionary measures, the receipts have sensibly disminished, and the sale of the bonds has altogether fallen away. Mr. B. D. Killian has been on trial before the Council of Ten for the last two days at Union Square. The proceedings are kept strictly private. It is started that Killian has called O'Mabony a "flut," to which the latter retorted in equally po-lite and unsatetesmanike phraseology. San Francisco, Thursday, May 3, 1866.

Consul Godey, Liberal, has official communications dated El Paso Del Norte, March 30, announcing that the Liberals took the city of Chibushua March 26th, after two days hard fighting, capturing 300 prisoners, among whom was Julio Carranca, the Imperial Mayor of Chibushua.

On the 22d the Liberals captured the city of Hidaljo del Parral by assault. These victories, it is said, will restore the State of Chibushua to the Liberal Government.

In Coahulia, at Santa Isabel, the Liberals had defeated the Imperialists, killing 131 and capturing 165. Bryant, the French commander, was slain. The enemy's artillery, baggage, and munitions of war all fell into the hands of the Liberals. San Francisco, Thursday, May 3, 1866.

Property.

Forthers Monrot, Thursday, May 3, 1866.

About 100 emigrants of all classes, ages and sexes, from the interior of North Carolina, passed by here last night on the steamer Adelaide, going West in search of employment. They were in charge of philanthropists from that section of the country. The movement was undertaken on account of the competition being introduced in their native State by the superabundance of negro labor, furnished under the ministrations of the Freedmen's Bureau.

Mrs. Jefferson Davis, accompanied by two servants and her youngest child, a little girl, arrived this morning. She was escorted by Licut. Fessenden into the Fortress. The conditions of her visit are unknown. She brought a large quantity of baggage with her, as if evidently designing to remain some length of time; in which event she will probably make her home at the residence of Dr. Cooper, the Post-Surgeon of the Fortress.

The large sale of quartermaster's property which commenced yesterday closed to-day. The aggregate amount will reach \$15,000.

and Resolutions.

CINCINATE Friday, May 4, 1866.

A Convention called to consider the propriety of organizing a separate State Government for East Tennesses met at Knoxville yesterday. Judge Sammel Rogers presided. He said he hoped the members would act deliberately and with caution. This was but an adjourned meeting of the Cenvention held at Greenville during the dark hours of the Rebellion. We propose to continue the movement. It is no secession movement. If we secede it will be from the Rebel to join the Union people. The new State can be made one of the richest in the Union.

At the conclusion of the remarks of Judge Mogers, Col. Temple from the Committee on Resolutions and Business.

At the conclusion of the remarks of Joure Angers, Col. Temple from the Committee on Resolutions and Bustness reported an address, which was unanimously adopted, stating that the Echeme had be in long cherished by East Tennessee. Rosros, Friday, May 4, 1866.

In the House of Representatives here this afternoon, the bill to equalize the bounties of the Massachusetts soldiers was passed to be engrossed by 110 ayes to 85 nays. Speaker Stone rules that the members of the House who had served in the army as soldiers and would be entitled to receive bounties if the bill became a law, would not be permitted to rote; and he gave a very long opinion in support of his ruling, eiting authorities in Enlish Parliamentary practice and in our own country, all bearing upon the subject, and after a long debate the ruling was sustained, 131 to 65, when the larger portion of those members who would be benefitted by the bill pecuniarily disclaimed any intention to receive any of the money that might be due them under the provisions of the bill, and this being entered on the journal, they were allowed to vote on it. Five thousand copies of the ruling of the Speaker, with his reasons as given, were ordered to be printed.

Wherever there is fifth, wherever there is a disoxygenated at Wherever there is fifth, wherever there is a disorygenated at mosphere, or one loaded with sulphide of ammonia, disinfectants should be used at once by the owners or occupants. We do not write in fear, but only in warning. Three cases of cholera have already occurred in the city, and two of the patients have died, the third, Mrs. Dooley, will probably recover, at least, that was the belief at the rooms of the Board of Health list evening at 60 clock, The deaths were those of Mrs. Jonkins, at the corner of Third-ave, and Ninety-third-st., and her son, Joshua Jenkins, aged seven months, who died at the Battery Barracks, yesterday morning at 7 o'clock. They show, we think conclusively, it at now, wherever circumstances are favorable, the disease will be developed. We exhort our readers to cleanliness, pure, fresh air, a wholesome diet and to avoid faitue. Under the same circumstances, last year, these persons in all probability would have died of typhold or typhos fever; this year they produce cholers.

The causes that developed the disease in Mrs. Jenkins are already known to our readers, and we print herewith a special report upon the circumstances which surrounded Mrs. Dooley. They are important in this particular—they warn all persons what to avoid for the purpose of preventing the disease. The facts herein detailed, and the surroundings as described, are sufficient, in any locality, to produce the same result:

Special Hearing of Applicants Before the Com mittee on Applications-Meeting Vesterday Afternoon - Licenses in New-Brighton -1.100 Licenses Issued.

Our readers are aware that all applicants for license to sell liquor who are without recommendations from the Captain of the Police Precinct in which their establishments are located, have special hearings before the Committee on Applications appointed by the Board of Excise. The first of this series took place yesterday morning, before Commissioners

Acton and Manierre. The applicants were from the First, Second, Third, and Twenty-aeventh Precinets, and the number examined was 52. Judged externally, these men looked like good citizens. They were well-dressed, and presented an appearance which suggested the possibility of better things than corner-groceries and anderground rum-holes. Many thiogs were developed, however, which we no not care to write, about the private character of some of the applicants, and which would only substantiste a fact already generally known, viz: that rum-shops are centers of other vices which are socially vasity worse than mere drunkenness.

The Commissioners listened respectfully to the dealers and heard their promises of reform in many cases numoved. The testimony against them was oftentimes more than they had expected, and acts were rehearsed that some of them doubtless deemed buried in the obliviou of the past or in the charnel-houses of their own memories. It is generally understood that no one who sells groceries will be permitted to sell liquors, some promised to abundon the former. If licensed to continue the latter business. Some of the catablishments have changed hands, passing from father to see, or from women to their brothers-in-law, since the Excise Law took effect. Some were found to be groceries only by name, others gambling-houses under the mask of drinking-saloons, some dens of thieves, or "lusting deess," to use their own verhacular, and a few were brothels. The worst of these classes, to be found in the Districts we have named, were absent, apparently waiting the result of the applications made by their neighbors. The better class of liquor dealers seem very well satisfied with the law which closed their establishments at midnight and upon Sundays and are glad to be relieved of these houses which are notoriously had. Applicants from the 4th, 5th, and 6th Pre-

after the adjournment of the Board of Health, all the members present. The minutes of the last members are and and ap-

proved.

In a committee on Applications reported the names of 696 bersons whom they recommended as proper parties to be enrusted with licenses. The licenses were issued, which makes total of 1,100 thus far granted by the Board.

Two of the cases reported upon however, were laid over the control of the cases reported upon however, were laid over the little the next meeting of the Board. One man had made application for two licenses for different houses, and another had our applications to do business in as many places. Judge locworth said that the law of 1800 allowed a license upon the souldilion that the applicant sold liquor in one place only, and hat it was surrepealed. The new excise law had a different haraseology on the same subject, but he thought the spirit was haraseology on the same subject, but he thought the spirit was

Commissioner Bitmosts offered the following, which was also adopted, after which the Board adjourned:

Resolved, That Police Inspector Folk's office, Brooklyn, be designated as the place to which parties dearing licenses to soil liquors in the towns of Flatbush, Flatbands, New Lots, Gravesend, and New Urrecht may apply for blank applications.

Mozart Hall and the Excise Law.

The Mozart Hall Democratic General Committee not on Thursday and agreed to the following:

Resolved. As the sentiments of the Mozart Hall General Committee, hat we utterly repudiate and condenn the action of the past State exclusions in the passage of the Excuse bill, as a measure repugnant to a remaining the control of the past State exclusions, in direct interference with the tights of citizens, and a belonging to a cless of isaws which no liberal, just or enlightened scople can state in.

Resolved. That like the other laws to establish boards of commissions for the Government of New York, the object of the Excise law to increase the political power of the party who govern the State. the other can be no other motive. Since the connecement of the state of coverning in this city, which began in 1857, by the creation of the Metropolitan Folice Department, the taxes have shamefully increased and good government decreased. A norde of official cormeants have been fastened on us, who, though foreign to our city in very respect, are yet plundering the people and demoralizing every until employment; of this class is the Folice Commission, the Health formission, the Fire Commission, the Fire Commission, the Fire the Commission of the State of the Power of the Commission of the Power of the Power of the Commission of the Power of the Commission of the Power of the Commission of the Power of t

ON RESPIRATORY EXERCISE IN THE PREVENTION AND CURE OF CONSUMPTION.

As physical exercise serves to develop and increase the muse predisposed to Consumption I know of no plan so well calculated to work off and fortify them against its fearful approach. And even when the disease has already fixed its relentless grasp upon the sysowerful auxiliaries in staying its further progress, and restoring the lungs to a normal condition. In this manner all the air passages are kept free and pervious, the oxygenation of the blood and the removal

disease. The importance of a daily and systematic source of respiratory exercise cannot be over-estimated. We have long been in the habit of recommending it to our patients; and we fully concur in

limits; at the end of the inspiration he is directed to retain the chest ize of the chort, by actual measurement; has been increased from two to three luches. And from the expansion of the chest thus acquired and the increased amount of oxygen brought in contact with the blood, a glow of health is imparted to the chesk, and the appetite, the power of diffection, as well as the assimplative functions, are all greatly

improved.

This is not a mere fancy; it is based upon sound philosophy and well-established physiological laws, and we claim that no treatment of Consumption can be successful that does not embody this important principle. When it is desired to develop the muscles, increase the rodily vizor, and improve the general tone of the system, we are told a exercise. So we would say to those whose respiratory organisms would avoid Consinue tion and an its discharge and copacity open air as much as you can, strive to develop the power and copacity of the lungs, and call into healthy activity all their is ent energies and impaired functions by a daily and fysicinatic course of respiratory Tide, then, is one of the chief corner stones upon which is founded

by means of these simple respiratory exercises so great an amount of same channel, directly to the seat of the disease in the lungs ?
